1. REFERENCE GUIDELINE: PR and PO Management, SCD-PSP-PRT-GL-002

2. RESPONSIBILITY

2.1 Procurement Buyer

- 2.1.1 Consults with respective Procurement Section Head on proper action for a particular transaction.
- 2.1.2 Aligns procurement action based on provisions/procedures detailed in this document.
- 2.1.3 Coordinates with Supplier and Requesting Division whenever necessary in the conduct of below procedures.
- 2.1.4 Advises the Requesting Division to delete 'floating Purchase Request (PR)' for procedure resulting to PR reverting back to 'Open' status.

2.2 Procurement Systems

- 2.2.1 Responsible for generating a report of draft or unapproved PR/PO/CV in Redrock.
- 2.2.2 Responsible for PR/CV/PO deletion as necessary or as requested by Procurement with the Requesting Division's confirmation.

3. PROCEDURE DETAILS:

3.1 Clean-up/Deletion of Draft PR and CVMB in RedRock

- 3.1.1 Procurement Systems to generate a report weekly of draft/unapproved PR/CVMB in Redrock. The generated report will be shared to the different Procurement sections.
- 3.1.2 Buyers to initiate the clean-up/deletion of draft/unapproved PR/CVMB by sending an email to the concerned Requesting Division, requesting for confirmation on any of the following:
 - 3.1.2.1 If the draft/unapproved PR/CVMB in the system is for deletion, the buyer will send an email request to Procurement Systems to assist in the deletion of the mentioned PR/CVMB.
 - 3.1.2.2 If the PR/CVMB is still needed, the buyer will request the Requesting Division to finalize and have the PR/CVMB approved as soon as possible. However, if the PR/CVMB is not needed anymore, Requesting Division will confirm to the buyer that it is okay to delete

and will be deleted by **Procurement** Systems accordingly, or
3.1.2.3 The **Requesting Division** will delete the draft/unapproved PR/CVMB from their end.

3.2 Clean-up/Deletion of Draft PO in RedRock

- 3.2.1 **Procurement** Systems to generate a report weekly of draft/unapproved PO in Redrock. The generated report will be shared to the different Procurement sections.
- 3.2.2 Buyers to clean-up/delete the draft/unapproved PO.

There are 3 ways on how to delete / cancel / close OPN-CMP/NA document in RedRock purchasing system:

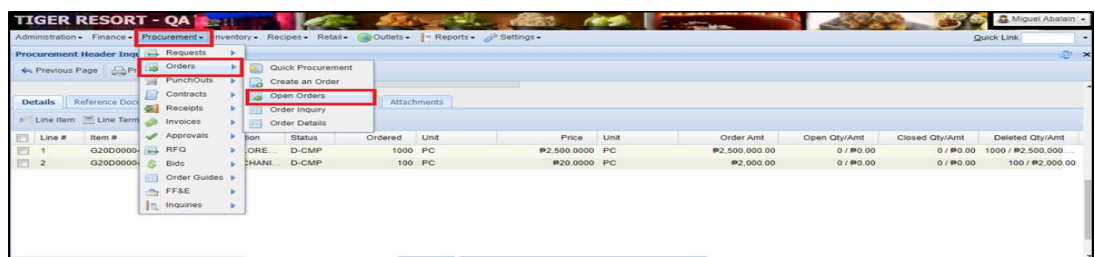

3.3 Deletion of Document

3.3.a. This function shall only be used when all line items are open or if the PO does not have a closed quantity, as this changes the document status to D-CMP/NA regardless of whether with or without a received quantity.

3.3.b. This can be performed by any buyer who has access role “Buyer” tagged on their account on the RedRock system.

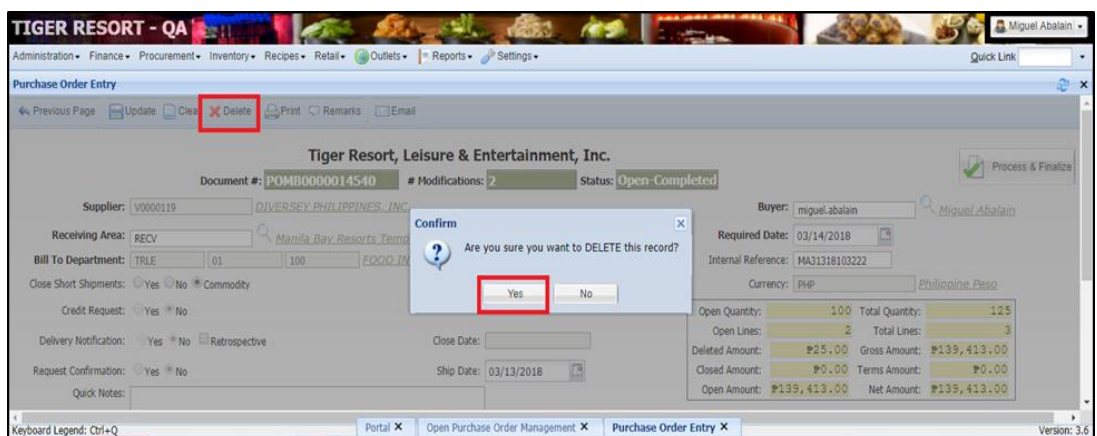

3.3.c. PO header and its open line item/s shall be deleted, and reference PR/s will reopen.

3.3.1 Go to Procurement > Orders > Open Orders

3.3.2 Search for the Open PO by indicating the PO Number from the search bar and tick “Search”.

3.3.3 Open the PO number and click “Delete” button.

3.4 Deletion of Line Item

3.4.a. Reverts the line item from the previous document and can be repetitively executed up to the level of PR. Once 'delete line item function' is used on the PR level, the function would change from reversal to deletion.

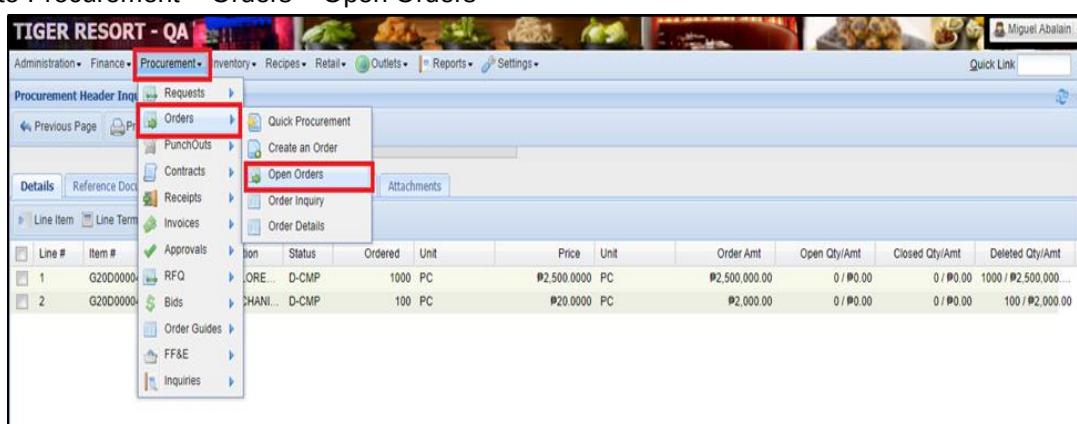

3.4.b. Selected PO line item shall be deleted and will revert back to Open in the reference PR.

3.4.c. If there is only 1 remaining line item in the PO and it was deleted, after hitting update, PO will change its status to:

- CLS (**Closed**) – if there are other line items that was closed
- D (**Deleted**) – if there are no line item that was closed at all

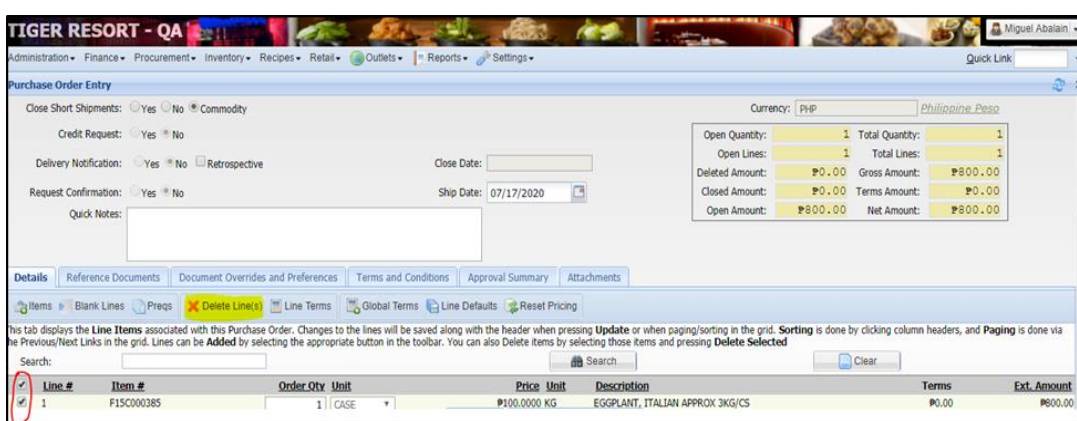

3.4.d. This can be performed by any buyer who has access role "Buyer" tagged on their account in the RedRock system.

3.4.1 Go to Procurement > Orders > Open Orders

3.4.2 Search for the Open PO by indicating the PO Number from the search bar and tick "Search".

3.4.3 Tick the desired line item and click "Delete Line(s)" button.

3.5 Closing of document

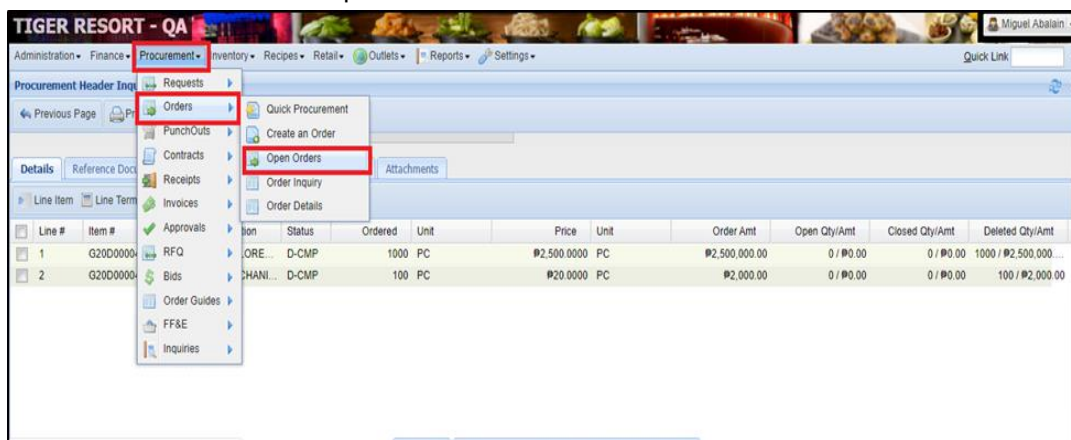

3.5.a. A function that is created in the system for those unfulfilled open transactions. This function is specifically used only for orders with partial deliveries, but Supplier will not be able to fulfill the remaining quantity, and Requesting Division accepts that the remaining open quantities cannot be completed.

3.5.b. Once Close document is applied, status will change to CLS-CMP. Remaining open quantities will be moved to deleted quantities.

3.5.c. PO or CV shall be fully closed in the system, including reference PR.

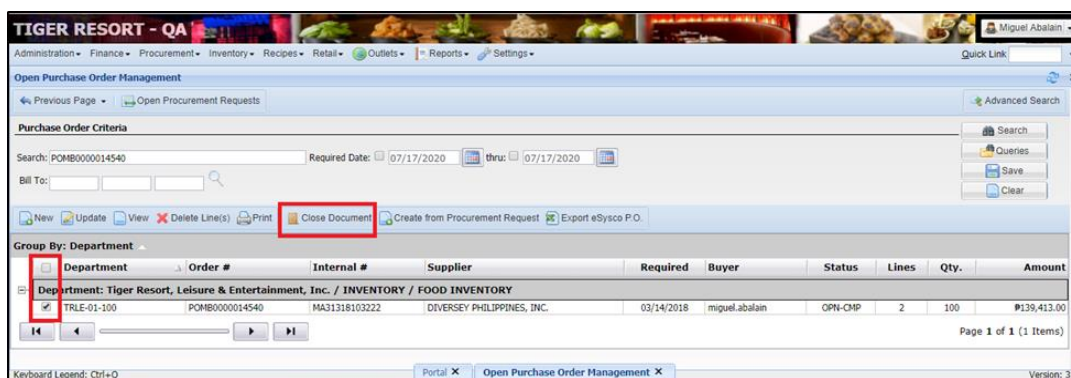

3.5.d. This function can be performed by both Receiver and Procurement as long as they have access role “Receiving” or “**Buyer**” tagged to their account in the RedRock system.

3.5.1 Go to Procurement > Orders > Open Orders

3.5.2 Search for the Open PO by indicating the PO Number from the search bar and tick “Search”.

3.5.3 Tick the PO document that is for closure, then click “Close Document” **button**.

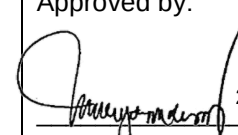

4. FORMS: N/A

5. REVISION HISTORY

Revision No.	Effective Date	Reason of Revision	Prepared by	Reviewed by	Approved by
00	26-Jul-2021	Initial	M.G.D.Cantiller	R. O. Basada	M.C.CRamoso
